

This price list provides information about the investigations that we offer, our treatments, and package prices. Please note that payment will need to be made before treatment commences.

Consultation and initial investigation fees (virology listed separately)

Consultant fee ¹	Advised on enquiry
Anti-mullerian hormone (AMH)	£125
2D Ultrasound scan	£262
3D Ultrasound scan	£407
Saline sonogram	£455
Hystero-Contrast-Sonography (HyCoSy)	£580
Semen assessment	£125

¹ All consultant fees are chargeable and paid directly to the consultant. You will be invoiced separately for this.

Treatment package prices

All cycle prices are provided in packages and detailed below. Drugs are charged separately and vary from patient to patient. You will be required to pay for prescriptions upon collection from the pharmacy of your choice. If you need to take the prescription outside of Hammersmith Hospital, this will need to be signed by a clinician.

Any blood or diagnostic tests required before the treatment cycle are not included in the package price. However, infection screening (HIV, Hepatitis B and Hepatitis C) will not be charged if you have a cycle of treatment with us within 3 months of the blood tests being taken.

The fee for a medical consultation is not included in the package price. Treatment can only start after you have seen the consultant of your choice, who will plan the details with you and create a booking form.

In-vitro fertilisation (IVF)¹**£5,300/cycle**

Nurse pre-treatment coordination appointment	Included
Virology screening bloods (HIV, Hepatitis B and Hepatitis C (if treatment commenced within three months of being taken)	Included
Chlamydia and Gonorrhea urine screen (if treatment commenced within three months of being taken) (female only)	Included
Two counselling sessions	Included
In-treatment scans and blood tests	Included
Egg collection	Included
Intravenous sedation administered by an anaesthetist at egg collection	Included
Sperm preparation	Included
Insemination	Included
Blastocyst culture	Included
Embryo transfer	Included
Embryo freezing (if applicable)	Included
Pregnancy test (one serum blood test for HCG)	Included
Early Pregnancy Scan (one scan only)	Included
Follow up consultation (within three months of the egg collection)	Included
HFEA license fee	Included
First year's embryo storage (if applicable)	Included

Additional charges

ICSI (micro injection of sperm — if applicable)	£1,295
Back up sperm freeze including one year storage (if applicable)	£505
Embryo transfer under sedation (if applicable)	£730
Medication cost	Not included
Annual storage fee (subject to a yearly increase) ²	£350/year

1 NB: On the day of the egg collection procedure, the sperm may not prepare well, requiring the treatment to be changed from IVF to ICSI. Should this occur, then the difference in cost between an IVF and ICSI treatment package will be charged accordingly. This will be discussed with you on the day, if appropriate.

2 Annual charges for storage are non-refundable if samples are stored for less than 12 months.

Embryo freezing cycle (IVF)

£4,880/cycle

Nurse pre-treatment coordination appointment	Included
Virology screening bloods (HIV, Hepatitis B and Hepatitis (if treatment commenced within three months of being taken)	Included
Chlamydia and Gonorrhea urine screen (if treatment commenced within three months of being taken) (female only)	Included
Two counselling sessions	Included
In-treatment scans and bloods	Included
Egg collection	Included
Intravenous sedation administered by an anaesthetist at egg collection	Included
Sperm preparation	Included
Insemination	Included
Blastocyst culture	Included
Embryo freezing (if applicable)	Included
Follow up consultation (within three months of the egg collection)	Included
HFEA license fee	Included
First year's embryo storage (if applicable)	Included

Additional charges

ICSI (micro injection of sperm — if applicable) ¹	£1,295
Back up sperm freeze including one year storage (if applicable)	£505
Medication cost	Not included
Annual storage fee (subject to a yearly increase) ²	£350/year

¹ NB: On the day of the egg collection procedure, the sperm may not prepare well, requiring the treatment to be changed from IVF to ICSI. Should this occur, then the difference in cost between an IVF and ICSI treatment package will be charged accordingly. This will be discussed with you on the day, if appropriate.

² Annual charges for storage are non-refundable if samples are stored for less than 12 months.

Egg freeze cycle	£4,055/cycle
Nurse pre-treatment coordination appointment	Included
Virology screening bloods (if treatment commenced within three months)	Included
Chlamydia and Gonorrhea urine screen (if treatment commenced within three months of being taken) (female only)	Included
Two counselling sessions	Included
In-treatment scans and blood tests	Included
Egg collection	Included
Intravenous sedation administered by an anaesthetist at egg collection	Included
Freezing of suitable eggs (if applicable)	Included
Follow up consultation (within three months of the egg collection)	Included
HFEA license fee	Included
First year's egg storage (if applicable)	Included

Additional charges

Medication cost	Not included
Annual storage fee (subject to yearly increase) ¹	£350/year

¹ Annual charges for storage is non-refundable if samples are stored for less than 12 months.

Egg thaw, fertilisation and embryo transfer cycle	£3,545/cycle
Nurse pre-treatment coordination appointment	Included
Virology screening bloods (if treatment commenced within three months)	Included
Chlamydia and Gonorrhea urine screen (if treatment commenced within three months of being taken) (female only)	Included
Two counselling sessions	Included
In-treatment scans and bloods	Included
Egg thaw	Included
ICSI (micro injection of sperm)	Included
Blastocyst culture	Included
Embryo transfer (if applicable)	Included
Early pregnancy test (one serum blood test for HCG)	Included
Early pregnancy scan (one scan only)	Included
Follow up consultation (within three months of the egg thaw)	Included

Additional charges

Medication cost (if applicable)	Not included
Embryo transfer under sedation (if applicable) (subject to yearly increase) ¹	£730
Freezing and storage of excess embryos (if applicable)	£350/year

¹ Annual charges for storage are non-refundable if samples are stored for less than 12 months.

DuoStimulation - Embryo freezing cycle (IVF)**£9,370/cycle**

Nurse pre-treatment coordination appointment	Included
Virology screening bloods (if treatment commenced within three months)	Included
Chlamydia and Gonorrhea urine screen (if treatment commenced within three months of being taken) (female only)	Included
Two counselling sessions	Included
In-treatment scans and bloods	Included
Egg collection	Included
Intravenous sedation administered by an anaesthetist at egg collection	Included
Sperm preparation	Included
Insemination	Included
Blastocyst culture	Included
Embryo freezing (if applicable)	Included
Follow up consultation (one within three months of the first egg collection)	Included
HFEA license fee	Included
First year's embryo storage (if applicable)	Included

Additional charges

ICSI (micro injection of sperm — if applicable) ¹	£1,295/ per egg collection
Back up sperm freeze including one year storage (if applicable)	£505
Medication cost	Not included
Annual storage fee (subject to a yearly increase) ²	£350/year

¹ NB: On the day of the egg collection procedure, the sperm may not prepare well, requiring the treatment to be changed from IVF to ICSI. Should this occur, then the difference in cost between an IVF and ICSI treatment package will be charged accordingly. This will be discussed with you on the day, if appropriate.

² Annual charges for storage are non-refundable if samples are stored for less than 12 months.

Frozen Embryo Replacement Cycle (FERC)

£1,975/cycle

Nurse pre-treatment coordination appointment	Included
Virology screening bloods (HIV, Hepatitis B and Hepatitis C) (if treatment commenced within three months of being taken)	Included
Chlamydia and Gonorrhea urine screen (if treatment commenced within three months of being taken) (female only)	Included
Two counselling sessions	Included
In-treatment scans and bloods	Included
Embryo thaw	Included
Embryo transfer	Included
Pregnancy test (one serum blood test for HCG)	Included
Early pregnancy scan (one only)	Included
Follow up consultation (within three months of the embryo transfer)	Included
HFEA license fee	Included

Additional charges

Blastocyst culture (if applicable)	£485
Medication cost	Not included
Embryo transfer under sedation (if applicable)	£730

Intrauterine insemination (IUI)

£1,400/cycle

Nurse pre-treatment coordination appointment	Included
Virology screening bloods (if treatment commenced within three months)	Included
Chlamydia and Gonorrhea urine screen (if treatment commenced within three months of being taken) (female only)	Included
Two counselling sessions	Included
In-treatment scans and bloods	Included
Sperm preparation	Included
Pregnancy test (one serum blood test for HCG)	Included
Early pregnancy scan (one scan only)	Included
Follow up consultation (within three months of the insemination)	Included
HFEA license fee	Included

Additional charges

Donor sperm (if applicable)	Not included
IUI under sedation (if applicable)	£728
Medication cost	Not included
Annual storage fee for donor sperm (subject to yearly increase) ¹	£350/year

¹ Annual charges for storage are non-refundable if samples are stored for less than 12 months.

Ovulation induction with oral agents (clomiphene citrate/letrozole) (OI)	£535/cycle
In-treatment scan and bloods	Included
Pregnancy test (one serum blood test for HCG)	Included
Early pregnancy scan (one scan only)	Included

Additional charges

Medication cost	Not included
-----------------	--------------

Ovulation induction with Gonadotrophins (GOI)	£805/cycle
In-treatment scan and bloods	Included
Pregnancy test (one serum blood test for HCG)	Included
Early pregnancy scan (one scan only)	Included

Additional charges

Medication cost	Not included
-----------------	--------------

Long term sperm storage	£1,250
Virology screening bloods (if stored within three months)	Included
Two counselling sessions	Included
Freezing up to three samples (if required)	Included

Additional charges

Annual storage fee (subject to an annual increase) ¹	£350/year
---	-----------

¹ Annual charges for storage are non-refundable if samples are stored for less than 12 months.

Introducing our new discounted third cycle offer

We have now introduced a three cycle discount on certain packages.

- 1. IVF treatment cycle
- 2. ICSI treatment cycle
- 3. Egg freezing cycle
- 4. Embryo freezing with IVF
- 5. Embryo freezing with ICSI

Please ensure you read the terms and conditions carefully.

The first and second cycles will cost the same as a single package price listed above. The third cycle, however, will have an approximately 15% discount applied to the same single price package. In order to receive this 15% discount on the third treatment cycle, you must complete the same three treatment packages within 12 months of the date of the first egg collection. Please note that this discount will apply to the package price only and does not include the cost of the medications. The discount package cannot be used in conjunction with any other discount.

Third cycle package price including the 15% discount (terms and conditions apply as above)

In-vitro fertilisation (IVF)	£4,505
Intracytoplasmic sperm injection (ICSI)	£5,535
Egg freezing cycle	£3,450
Embryo freezing cycle with IVF	£4,150
Embryo freezing cycle with ICSI	£5,250

Private Donor Treatment

If you do not have your own donor, we work with a selection of organisations who can support you in finding a suitable donor. What you pay to the third party for finding you a potential donor, is not part of the cost of the cycle and they do not pay us.

In the case of a known donor, they will need to be screened to confirm they are a suitable candidate. All screening tests need to be paid and performed before your donor can start treatment. If the donor is not deemed to be suitable, then we are unable to reimburse you for the costs incurred.

If you are a donor recipient, you may also require additional blood tests before treatment, to screen for genetic conditions or infections. Your consultant will discuss these with you. These will also incur an additional cost that you will be liable for.

Any costs for donor treatment that are partially covered by the NHS will be discussed individually with you. Below is an example of costs for private donor treatment. Additional tests may be required and the cost of medication is not included in the price list.

Treatment with an egg donor

Consultation fee ¹	Advised on enquiry
Screening of the recipient	Not included (can be provided on request)

¹ All consultant fees are chargeable and paid directly to the consultant. You will be invoiced separately for this.

Additional charges

Eggs	Not included
Screening of the egg and sperm	Not included (can be provided on request)
Egg thaw, fertilisation and embryo transfer cycle	See above
Embryo freezing with ICSI treatment (if applicable)	See above
Frozen embryo transfer cycle (if applicable)	See above

Treatment with a sperm donor

Consultation fee ¹	Advised on enquiry
Screening of the recipient	Not included (can be provided on request)

¹ All consultant fees are chargeable and paid directly to the consultant. You will be invoiced separately for this.

Additional charges

Sperm	Not included
Screening of the sperm source (if applicable)	Not included (can be provided on request)
Freezing of sperm for the quarantine period (if applicable)	£350/per year
Intrauterine insemination (if applicable)	See above
IVF or ICSI treatment cycle (if applicable)	See above
Embryo freezing with IVF or ICSI treatment (if applicable)	See above
Frozen embryo transfer cycle (if applicable)	See above

Female assessments

AMH (anti-mullerian hormone)	£125
FSH (Follicle-stimulating hormone)	£75
LH (Luteinizing hormone)	£75
E2 (Oestradiol)	£75
TFT (Thyroid Function Test)	£115
2D ultrasound scan	£262
3D ultrasound scan	£455

Male assessments

Semen assessment	£125
FSH	£75
LH	£75
Testosterone	£60
Y-chromosome microdeletion	£235
Karyotype	£485
CF screen (Cystic fibrosis)	£295

Other blood tests

CMV (Antigen)	£120
TPHA (Treponema pallidum hemagglutination assay)	£120
HCG (Beta HCG)	£115
Progesterone	£70
Thyroid peroxidase antibodies	£115
Karyotype blood test	£485
Prolactin	£50
Rubella	£60
Hepatitis B DNA (viral load)	£320
Hepatitis C quantification (viral load)	£280
Treponemal serology	£65
Fragile X Syndrome	£345
Zika by PCR (Blood)	£235
Haemoglobin electrophoresis	£110
Tay-Sachs carrier screen	£360
Thalassemia	£160
Sickle Cell	£110
Other bloods	POA

Other screening packages

Virology — Pre-treatment screen (female and male) — (HIV, Hepatitis B surface antigen, Hepatitis B core antibody and Hepatitis C Screening prior to IVF treatment). Virology is valid for three months (If these need repeating, it will cost £155 per patient)	Included in treatment price package or £155 per patient if a repeat is required
Chlamydia and Gonorrhea urine screen (this is valid for up to three months prior to the initial treatment cycle (If these need repeating, it will cost £95 per patient)	Included in treatment price package or £95 per patient if a repeat is required

Chargeable extras

Pregnancy scan (per scan)	£265
Follicle/cycle monitoring (per scan)	£215
Supportive or Implications counselling with our in-house counsellor	£95
Cyst drainage under sedation	£730
IM Injection by a nurse (you will be required to take most injections outside of the unit hours in order to follow protocol) (per injection)	£30

Add on treatments

The Wolfson Fertility Centre provides evidence-based treatments, and we actively participate in research to further our knowledge and develop new treatment options. We are also open-minded about emerging techniques which may not yet have been proven to improve pregnancy rates. Where relevant, your consultant may discuss optional extras ("add-ons") plus the research and potential benefits and risks associated with them at your consultation. Please see below for our charges.

Add ons ¹

Endometrial scratch (if sedation is required there will be an additional cost of £730)	£315
Embryo Glue	£150
ZyMot	£150

¹ We advise you to refer to the HFEA website for further information regarding the use of additional techniques in your treatment prior to consenting to their use.

Genetic testing

PGT-A work up fee (non refundable and payable prior to each treatment cycle/ egg collection)	£300
PGT-A (includes biopsy and testing per embryo)	£500
PGT-A complete Workup fee plus cheek swabs (non-refundable and payable prior to each treatment cycle/egg collection)	£500
PGT-A complete (includes biopsy and testing per embryo)	£550
PGT-A complete retrospective (testing per embryo)	£50
PGT-M work up fee (non-refundable and payable once per condition, prior to treatment)	£2,500
PGT-M (price includes biopsy analysis and testing per embryo)	£640
PGT-SR work up fee (non-refundable and payable once per condition, prior to treatment)	£1,050
PGT-SR (includes biopsy and testing per embryo)	£640
Embryo thaw for the purpose of genetic testing, and refreeze (excludes the work-up fee, biopsy and genetic testing fee)	£1020
Genetics Counselling Session for PGT-A tested embryos (delivered by a third party, Cooper Genomics)	£160 per session
General genetics counselling	Available on request

Movement of samples (import and export)

Movement of frozen samples — WITHIN THE UK ¹	£375
Movement of frozen samples — INTERNATIONAL ¹	£480

¹ There are courier fees associated with the transport of samples. These are paid directly to the courier and is not included in the listed price. There are several couriers available, and you can email them directly to obtain a quote.

Additional charges

Additional media costs (where applicable) — for eggs/embryos that have been frozen using a system that is not routinely used in the WFC, this will need to be bought by the clinic to thaw your material. Contact the embryology team for further information.

Available on request by the embryology team

Important finance information

Payment for the consultations is due directly to the consultant. Payment for treatment is due prior to the nurse pre-treatment coordination appointment. Payment for pathology tests is due at the time of the request. Payment for medications is due before they are dispensed at the pharmacy and is paid directly to the pharmacy.

Payment methods

We prefer that you pay using debit or credit cards, apart from American Express. We accept card payments through the online patient portal, in person or over the telephone in advance of your treatment. We will also accept cash through the Cashiers office in the Sainsbury Wing at Hammersmith Hospital.

Please note, when making card payments we may store your card details on your account. We will not do this without asking you first. This makes it easier to process potential refunds or deduct annual storage payments or settle outstanding balances. We will not take payment without notifying you. Please ensure that you provide us with up-to-date contact information so that we can communicate with yourself/yourself.

Deposits

To secure your nurse pre-treatment coordination appointment booking, we will require a deposit for your treatment package. Due to high demand, we require at least 48 hours' notice if you choose to cancel or reschedule this appointment. You will be charged a cancellation fee as per the below cancellation policy.

Insurance

If you are insured and your insurance company is paying your account, you will be required to pay a deposit for your treatment and you may claim this back directly from them.

Promotions

We have set promotional rates for repeat cycles (detailed in above list) and occasionally offer other promotions. Please note any promotion is not valid in conjunction with other promotions, discounts or vouchers.

Refunds and cancellation

Imperial College Healthcare Private Care appreciates that there are a number of reasons for why you may decide not to proceed with treatment or treatment is discontinued for medical reasons. In these circumstances a full or partial refund may apply depending on the treatment delivered so far. Please see the cancellation policy.

If you decide not to go ahead with your treatment, please provide us with the original receipt and we will make the appropriate refund as per the cancellation policy.

If you would like to apply for a refund, please email imperial.wfcprivate@nhs.net. Please note that it can take six weeks to process a refund. Please note card refunds take approximately five working days to return to your bank account dependent on your bank. For security reasons, the refund will only be returned to the same card with which you paid with. Cash and Bank Transfer refunds may take longer. Further details of the cancellation fees per treatment type are detailed below.

IVF, ICSI, egg freezing or egg donation cycle

If an IVF, ICSI, egg freezing or embryo freezing treatment cycle is discontinued before treatment or screening/coordination attendance has started, you are entitled to a full refund of the treatment package price. We cannot make any refunds for the cost of consultations, pre-treatment investigations or the cost of drugs for the treatment cycle that have been paid for at a pharmacy.

If no eggs are collected or collected eggs do not fertilise or the fertilised eggs do not create a viable embryo, then a proportion of the treatment price will be refunded as per the cancellation policy.

Once prescriptions are collected, they cannot be returned or refunded. We will always try to minimise wastage with prescriptions, so you may need to visit a pharmacy more than once during your treatment cycle.

If you are having an IVF or ICSI cycle and your fresh embryo transfer does not go ahead because you are not medically ready, you will be offered to return for a frozen cycle once you have recovered. Please note that this frozen cycle is chargeable as per the cost of a FERC on our price list outlined above. You will also receive a partial refund of what you have paid for the IVF or ICSI price package as per the partial refunds section.

IUI (Intrauterine Insemination)

In the event that insemination does not take place, but you have already started the stimulation drugs, a refund will be given as per the cancellation policy. We do not refund any costs relating to the pre-treatment procedures or drugs.

If you start an IUI cycle but the cycle is converted to IVF or ICSI, you will be asked to pay the additional cost which is the difference between the cost of IUI and IVF or ICSI.

We are unable to refund the cost of the sperm if donor sperm has been bought from a sperm bank.

FERC (Frozen Embryo Replacement Cycle)

If a FERC cycle is cancelled for medical reasons before your embryos are thawed, a refund will be given as per the cancellation policy. If the embryos fail to thaw successfully, a refund will be given as per the cancellation policy.

Cancellation fees

A cancellation fee will be applicable if a cycle is abandoned, to cover the costs already incurred. We do not reimburse consultations, pre-treatment, investigations, drug costs or the cost of genetic material such as eggs or sperm.

Cancellation fees

Cancelled IVF or ICSI before medication is started but after the coordination appointment.	£285
Cancelled IVF or ICSI after one treatment scan.	£555
Cancelled IVF or ICSI cycle after more than one treatment scan but before egg collection.	£825
Cancelled IUI before treatment is started but after the coordination appointment.	£285
Cancelled IUI cycle prior to insemination but after treatment has started.	£400
Cancelled FERC after the coordination appointment.	£285
Cancelled FERC after the co-ordination appointment and at least one scan.	£400

Partial refunds for failed treatment

We understand that it can be very disappointing if your treatment is not successful. We are unable to reimburse you the cost of the cycle, due to costs incurred, however, we do offer a partial refund in specific circumstances. The private care team will confirm this.

Partial treatment refunds

No eggs are collected at egg collection – if any eggs are collected this refund is not applicable.	£440 for IVF £1,540 for ICSI
Collected eggs fail to fertilise, or the created embryos do not survive to the transfer day.	£440
Thawed embryos do not survive to the transfer day (FERC cycle).	£240
Fresh Embryo Transfer does not go ahead due to medical reasons or no transferable embryo has been created.	£390
Sperm sample not suitable for freezing	£450 if backup £1,050 if long term storage

Pricing Frequently Asked Questions

What blood tests will I need before I start treatment?

Before you have a cycle of IVF you will need some blood screening tests done. Your doctor will discuss these with you. This may be to check if you are a carrier of some genetic conditions. These blood tests are chargeable and are not included in any of our packages.

If you do have blood results from a recent NHS cycle or a recent private cycle and the results are still valid, they may not need to be repeated. Please note that virology blood tests performed elsewhere must have been done by an appropriately accredited laboratory in order to be accepted.

How much will my drugs cost and what if I have medication left over?

As a private patient, you can use the pharmacy here at the hospital or a pharmacy of your choice. The pharmacy based at Hammersmith Hospital aims to price match other pharmacies, so the costs remain as low as possible. Drug costs vary from patient to patient. We are unable to guarantee the cost as each patient will respond at different rates. The team will always try to prescribe only what they think will be needed, so you may need to collect more than one prescription per treatment cycle. This helps to avoid wasted medication in case you respond quicker than expected. We are unable to refund the cost of any unused drugs. All drug payments are made directly to the dispensing pharmacy.

How often will I be charged for storage?

Storage is currently £350 per year and invoiced per annum. This fee is reviewed annually at the end of March and subject to change. You will be invoiced annually for this charge on the anniversary of your treatment. If you no longer wish to store your sperm, eggs or embryos then you can contact us to discard them.

Consent is required for disposal. If you plan to use your samples but have not yet done so — you will still be invoiced annually. Please ensure you keep us up to date with your address and contact details, to ensure we can contact you regarding storage and consent.

Can I have back to back cycles? Is this cheaper?

Some patients may wish to have more than one cycle and we offer attractive multiple package prices. Your consultant will advise you if this is suitable for you.

Can I have my embryos brought here from another clinic?

You will need to have a consultation before we can accept a transfer in. If you wish to transport eggs, sperm or embryos to the Wolfson Fertility Centre from another IVF unit, please then contact the IVF unit where your eggs, sperm or embryos are stored informing them of your wish to transfer them to the Wolfson Fertility Centre. If you wish to transport eggs, sperm or embryos from the Wolfson Fertility Centre to another IVF unit, please contact the Embryology team. We will require the name of the unit where they will be transported to and the name of an individual and/or email address for correspondence with that IVF unit.

There is courier fees associated with the transport of samples. These are paid directly to the courier. Courier fees will vary depending on the destination.

The cycle was not successful – no eggs were collected, my eggs did not fertilise or they did not result in good quality embryos – can I get a refund?

If no eggs are collected, they fail to fertilise or the resulting embryos are not suitable to use, we will offer you a partial refund as per our price list. The doctors are unable to say before the egg collection day, how many eggs are expected, whether these are suitable for use in treatment, nor whether fertilisation will be successful after eggs are collected.

What happens if I need ICSI instead of IVF on the day of egg collection?

On the day of your egg collection procedure, your partner will be expected to produce a fresh sperm sample unless you are using donor sperm or your partner has paid to freeze and store his sperm. Before commencing treatment your consultant commonly advises male partners to carry out a semen analysis to determine if ICSI is required. Sometimes the sample produced on the day is of low quality and ICSI is then required. In these circumstances, patients who only paid for IVF will be required to pay the ICSI fee difference.

I was not medically ready for a fresh embryo transfer following egg collection, what happens next?

If our clinical team determines you are not medically ready for a fresh embryo transfer following your egg collection this means your embryos will be frozen and stored. You will be advised to return for a frozen embryo replacement cycle (FERC). This FERC cycle is chargeable per our price list. You will also receive a partial refund per our price list. You will need to have a FERC co-ordination appointment with the nurse before you can commence this cycle of treatment.
